PROFESSIONAL SUMMARY

Business Intelligence and ERP Specialist with 20+ years of experience across retail, distribution, and technology sectors in the U.S. and Latin America. Deep expertise in Microsoft Dynamics 365 Business Central implementation and optimization (supply chain, manufacturing, logistics), enterprise BI reporting, and process transformation. Proven track record leading cross-functional teams and delivering data-driven solutions that reduce operational costs and improve decision-making. Bilingual: English / Spanish.

WORK EXPERIENCE

Kwong Yet Lung Co — **Business Intelligence & ERP Analyst** *Nov 2022 – Present*

Las Vegas, NV

- Led UAT sessions in Microsoft Dynamics 365 Business Central covering manufacturing, BOM, logistics and supply chain modules; identified and resolved process gaps in warehouse and production workflows.
- Managed the BC version migration from on-premise v14 to SaaS v23, ensuring continuity of operations and adoption of best practices across Logistics, Production and 3PL movements.
- Automated inventory, sales and pricing reports using Python and SQL, reducing manual workload by ~40% and delivering real-time visibility into inventory turnover and vendor performance.
- Developed cost-plus pricing models for fresh produce procurement, improving gross margin visibility and supplier evaluation.
- Validated and implemented the InsightWorks mobile solution for warehouse operations (picking, packing, shipping, license plate management), increasing throughput and accuracy.
- Explored AI/LLM technologies (OpenAI, Hugging Face) for predictive demand forecasting and automated reporting pipelines.

Aargon Collection Agency — **Software Development Engineer** *Sep 2021 – Oct 2022*

Las Vegas, NV

- Designed and maintained business applications integrated with ERP systems using ASP.NET, VB.NET and C#.
- Automated credit card processing workflows and developed relational database structures to support data integrity and application design.
- Created interfaces between web systems and internal platforms, improving integration reliability and data flow.

Freelance — **BI & Operations Consultant** *Jan 2017 – Sep 2021*

Remote — U.S. & Latin America

- Delivered BI reporting and supply chain analysis for retail and distribution clients using SQL, Python and Power BI.
- Digitized manual processes for family-owned businesses during COVID-19 disruption, migrating data to cloud tools and improving supply/demand visibility.
- Developed automated sales, pricing and inventory reports that replaced Excel-based manual processes.

Infosys Mexico Ltd. — **Application Support – Business Intelligence Lead** *Nov 2013 – Nov 2016*
Mexico City, Mexico

- Led a team of ~5 offshore BI engineers in India supporting enterprise ecommerce payment and reporting systems.
- Owned BI reporting and data analysis using SQL Server, SSRS and Power BI for credit card payment platforms, ensuring reporting accuracy, availability and governance.
- Partnered with cross-functional business and technical stakeholders to translate requirements into BI deliverables on schedule.

Walmart Mexico & Central America — **BI Coordinator / Pricing Analyst / Supply Chain** *Jan 2002 – Oct 2013*
El Salvador & Mexico City

- **Led enterprise BI reporting across Marketing, Finance and Logistics using SQL Server and SSRS; governed ETL monitoring workflows across multiple regional projects.** BI Coordinator (2010–2013):
- **Developed competitive pricing models and revenue optimization strategies using Oracle PL/SQL, supporting decision-making across regional markets.** Pricing Analyst (2006–2010):
- **Managed warehouse operations at Cascadas distribution center overseeing 15M+ inventory units; supervised a team of 20 across cycle counting, purchasing, shipping and packing.** Supply Chain / Warehouse (2002–2006):

EDUCATION

M.S. Applied Statistics for Data Science — Nebrija University, Madrid, Spain (2024–2025)
B.S. Computer Science — University of Technology (UTEC), El Salvador (2012)
Specialization: Data Mining — UTEC, El Salvador (2011)
